

Marley Cooling Towers - Quick Reference Guide

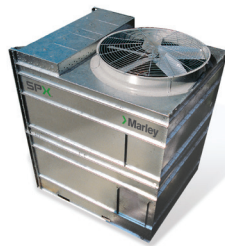

Tons

MD Series

Counterflow / Induced Draft
Ideal for applications where weight is a primary issue such as rooftop installations.

AV Series

Crossflow / Induced Draft
Ideal for applications below 350 tons requiring high energy efficiency, robustness, easy maintenance, and accessibility. Offers the smallest total footprint.

NC Series

Crossflow / Induced Draft
Ideal for applications above 350 tons requiring high energy efficiency, robustness, easy maintenance, and accessibility. Marley's gearreducer is a standard option.

Aquatower

Crossflow / Induced Draft
Niche Product: Ideal for low tonnage applications. Tower is available with a fiberglass option.

MCW Series

Counterflow / Forced Draft
Niche Product: Ideal for indoor applications which require ducting.

JT Series

Counterflow / Forced Draft
Niche Product: Ideal for indoor applications which require ducting or low profile applications.
